

Norbury park house

Norbury park house ▼

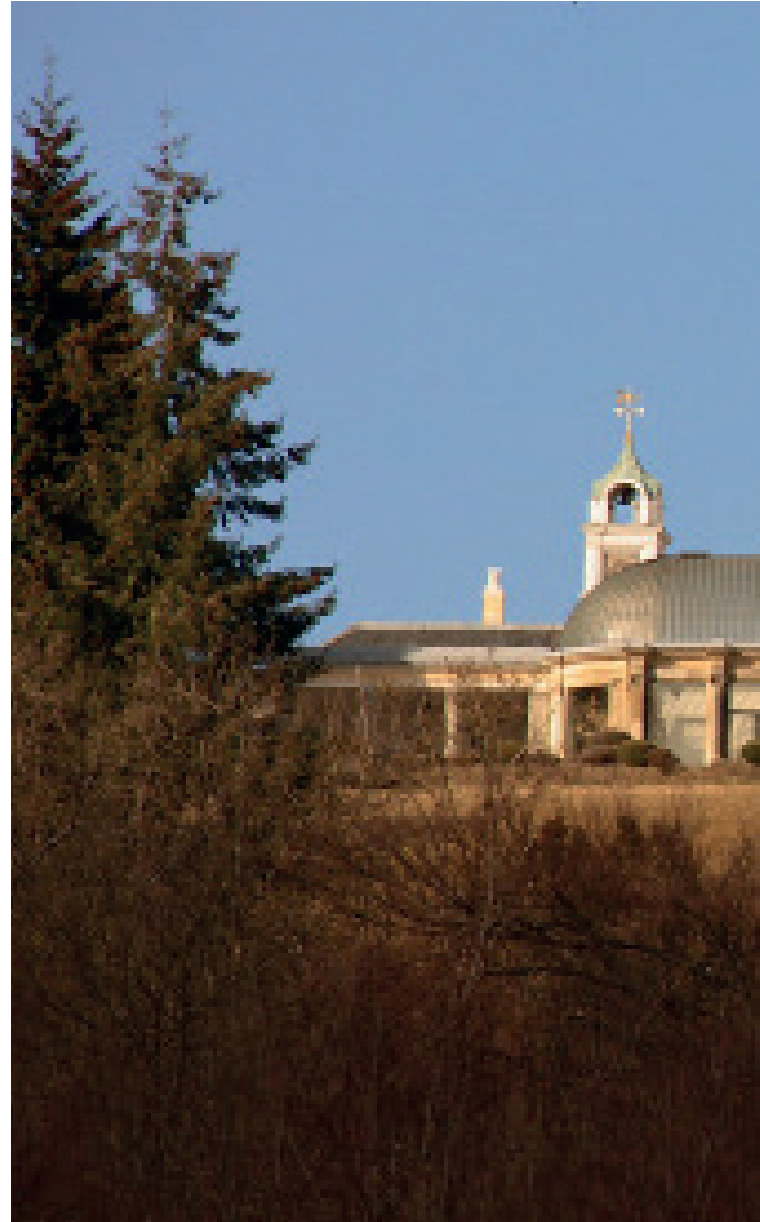

Norbury Park House is a mansion near Dorking in Surrey. The house was built in 1774 and was in the process of being refurbished and extended by the current owners.

As part of the modernisation project, the owners wanted to reduce the running costs for the house. A 25-100kW ecoGEO basic ground source heat pump system with energy collected from 11 x 140m boreholes in the grounds was installed.

The system provides all the heating and cooling requirements for the house.
