

Yonder thatch

Installation summary

Location: Sussex, England
Year: 2018
Type of installation: Ground Source
Power: ecoGEO 5-22 kW
Services: Heating and DHW

Background

Yonder thatch was a 160m² house in west Sussex, which recently underwent an extension to 240m². The owners wanted to use this opportunity to reduce their running costs and carbon footprint as much as possible.

There is installed a 22kW ecoforest heatpump with a 500L cordival water tank to need their needs. The heatpump was connected to six 200m ground loop pipes, supplying them with enough energy to heat their new 500L water tank.

Since installation they have had “zero complaints” are feel completely satisfied with their new renewable energy system.
